

BXT-10

Battery Powered Combination Tool for Polyester and Polypropylene Strapping

Easy operation

- Ergonomic design reduces operator fatigue
- Two-button process ensures simple operation

Maximum uptime

- High speed performance increases efficiency
- Simultaneous loading of both strap ends minimizes loading time

Improved battery power

- Output of 300 strapping cycles between recharges maximizes productivity
- Battery recharges in only 60 minutes
- Low battery level still supplies peak tension levels

Specifications

Strapping: For use with 3/8" to 1/2" (9mm and 13mm) polyester and polypropylene strapping

Tension Rating: Up to 150 lbs

Weight: 7.8 lbs (3.5 kg)

Charger and two batteries included
